

I would like to file a complaint against the FCC. I wonder when this country actually turned into Russia. Whatever happened to if you don't like it, turn it off? It seems like if one person complains about something offending them, it doesn't matter that the other 20 million people enjoyed it. Whatever happened to freedom of speech? That is our first ammendment, right? The next thing you know you'll be telling us what we can listen to in our cars or houses. If I don't enjoy rap music and make a complaint. Does that mean you'll take the rap radio stations off the air? No! Because there are millions of people who do like rap. Why don't you worry about something that's really hurting our country, like a war that we are fighting for no reason. Find something better to do with your time than tell me what I can listen to or what I can see!!!!!!
